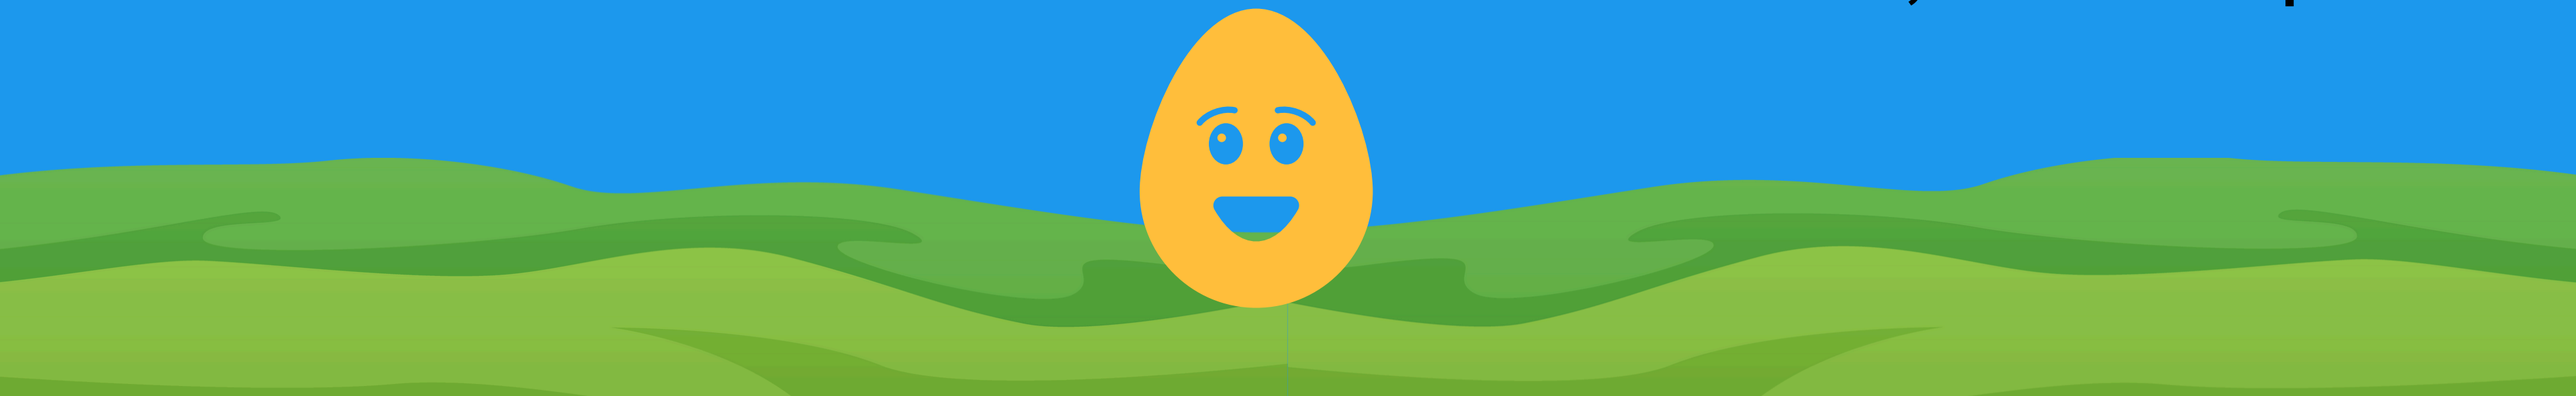
the first page is the first visual that player will see when they enter the game.

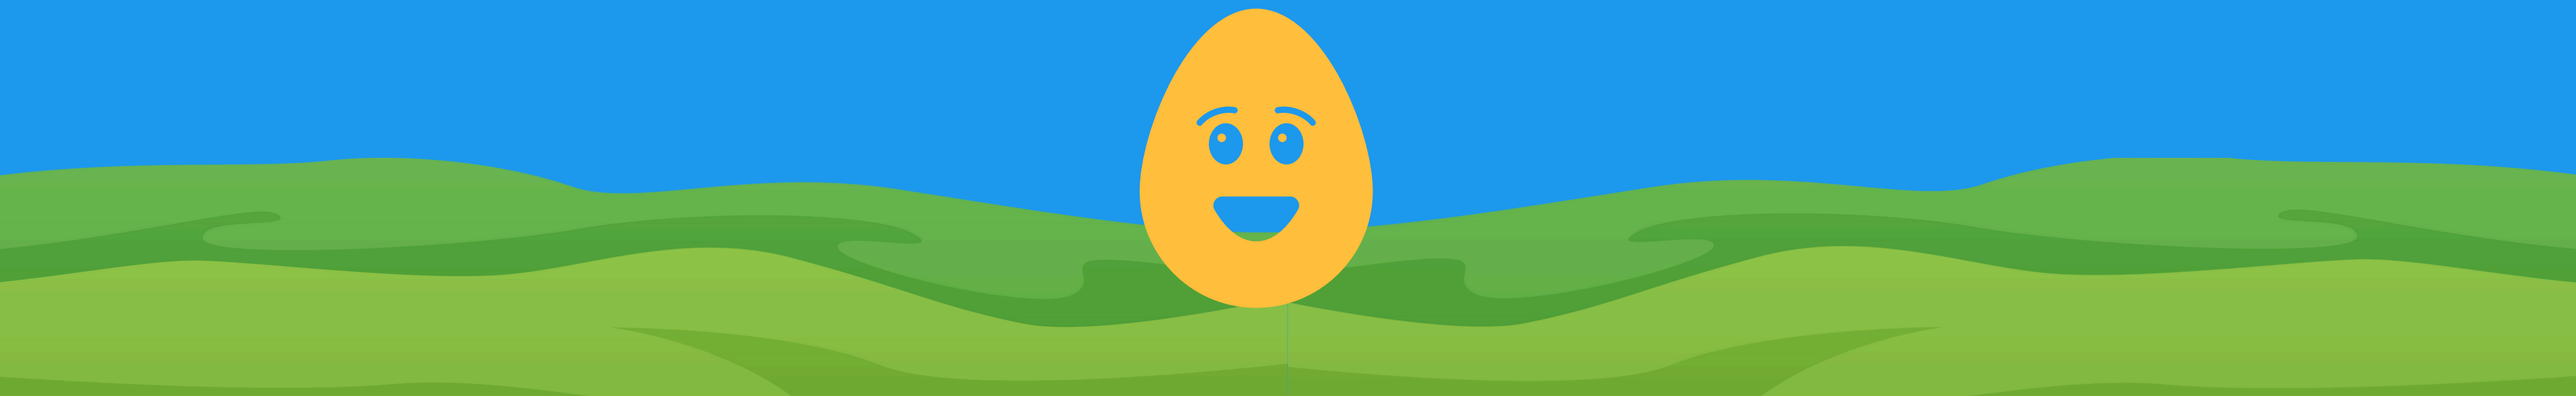
it consist of floating grounds, clouds, and cookies.

this is our character, his name is pie.



Score : 0

when the player click at the floating grounds that have cookies on it, pie will immediately pop on top of the selected floating ground.

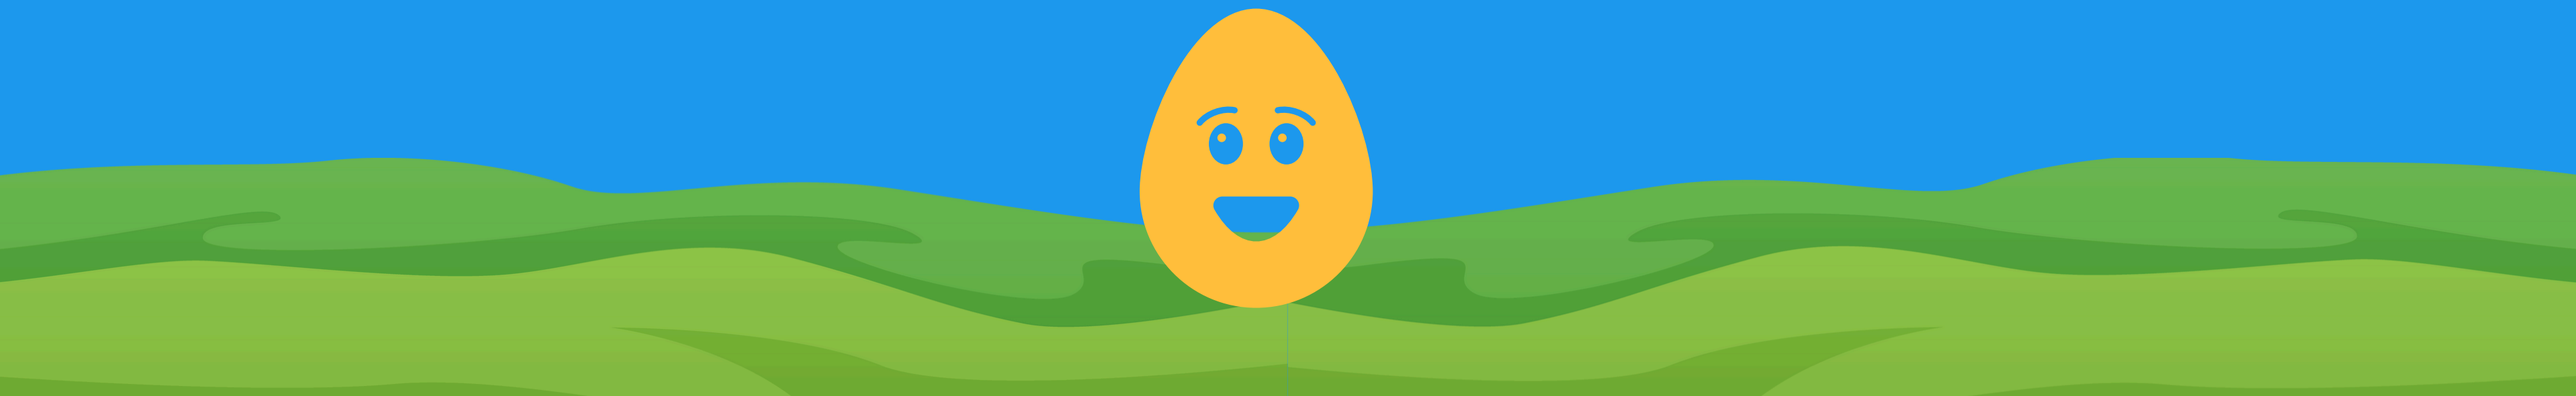


Score : 1

as we can see on previous slide, pie immediately appear at the location of floating ground that were click by player by using mouse.

when pie pop at the ground that have cookie on it, the cookie will disappear and 1 point is added to the score at left top page.

when a cookie disappear, another cookie will appear at random clouds or floating ground (as we can see, a cookie appear on top of a cloud).

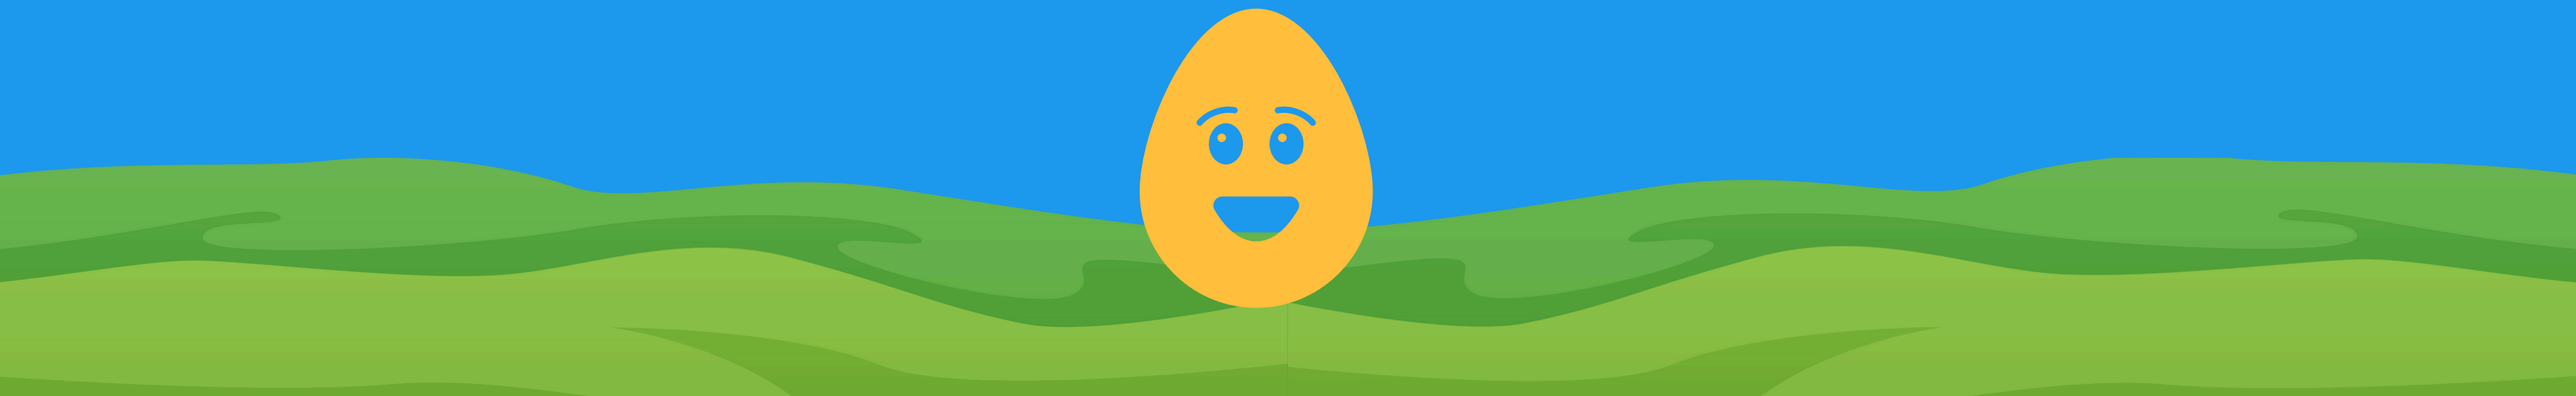


Score : 1

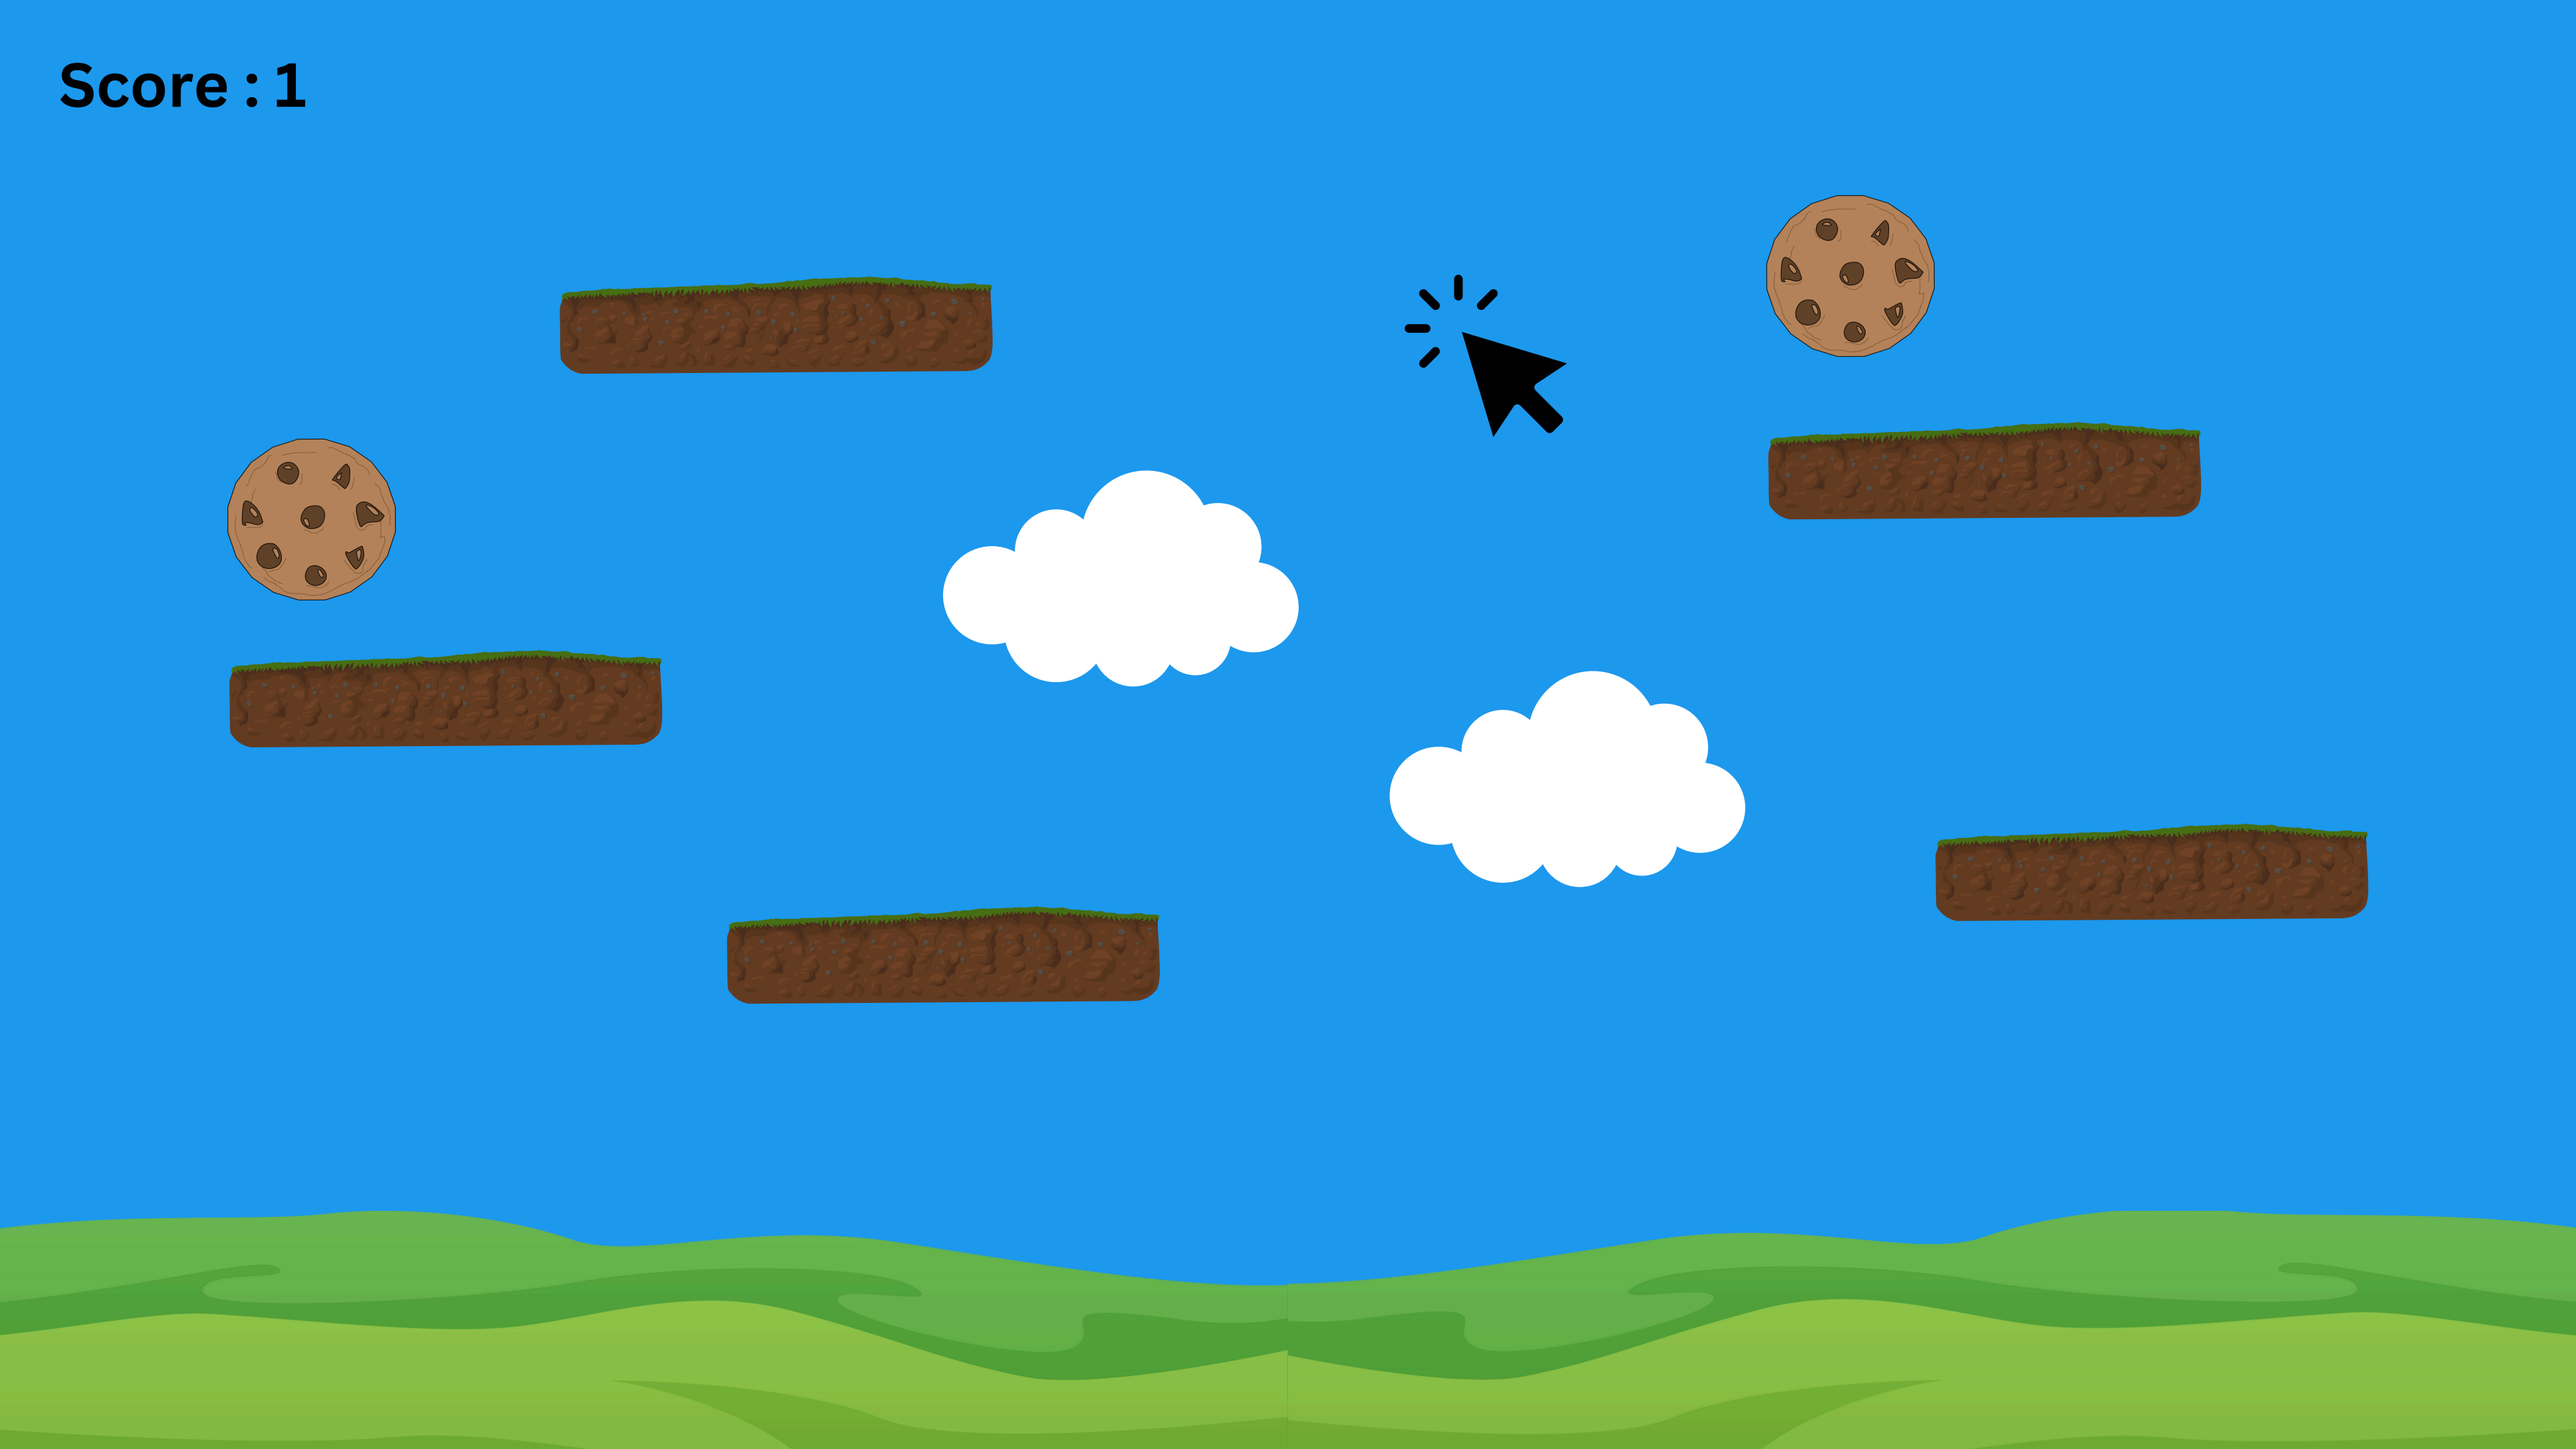
here is the catch, when player click on cloud, both the selected cloud and pie will disappear (i will show on next slide).

therefore, player can only click on floating ground to avoid game over.

when cookie appear on top of any clouds, player will still lose if they click on it even when they want to add point by catching cookie.



Score : 1



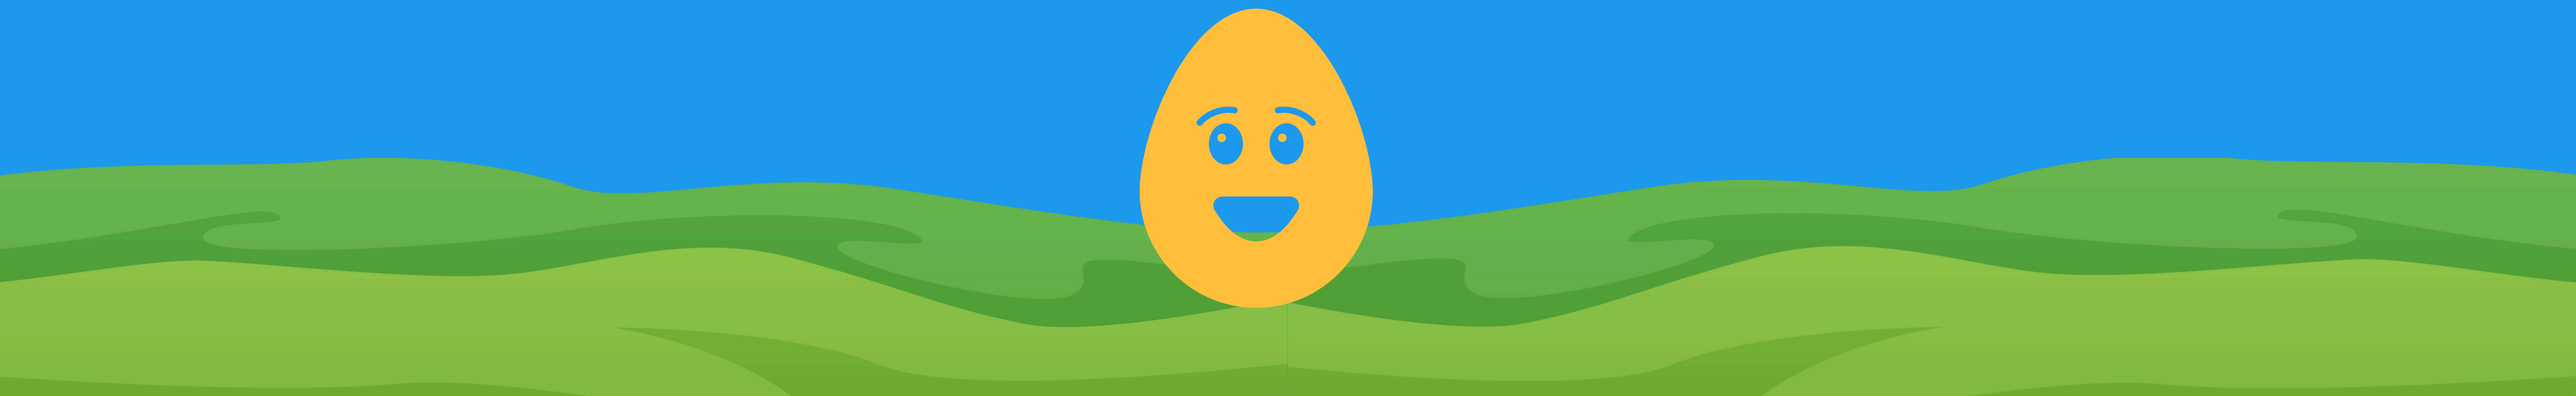
Score : 1

the game will carry on, 1 point will be added to score when player click on floating ground with cookie on top of it.

if player click on ground with no cookie on top of it, no point will be added to score.

player immediately lose if they click on any clouds.

game will show ‘LOSER’ when player lose.



LOSER
